

Screw Pumps

LXB Series

LXB series Screw Pumps are Used for conveying thick liquid-solid mixtures and slurry such as grit, dewatered sludge, etc.

Features and Benefits

- Higher flowrate at a lower running speed compared to centrifugal pumps
- Economize on energy.
- Simple and sound for pump station
- Cost effective at a high running efficiency
- Easy for installation and maintenance

Applications

- All kinds of pump stations for water and wastewater control
- Agriculture Irrigation
- Flooded Area Drainage
