

Floating Arm Decanter PFA Series

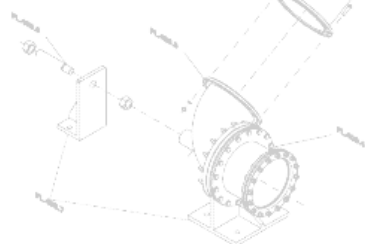

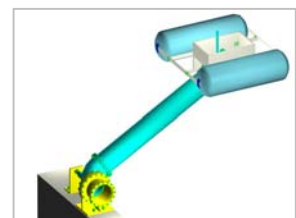

“Simple, durable and cost effective!”

PFA series floating arm decanters are cost effective for your satisfactory method of controlling the rate of discharge of waste liquors of all kinds, prior to their entry into drains and/or treatment plants, the constant volume design of floating arm, illustrated here, was evolved and has been successfully used in many installations.

The orifice is accurately machined into Stainless Steel plate, attached by bolts, can prevent the entry of scum and floating debris.

Standard Sizes from 80mm to 400mm, outlet pipe diameter, to discharge up to a maximum of 583m³ per hour. We shall be pleased to advise on specific requirements
